Our core activities

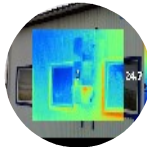

Integrated engineering design

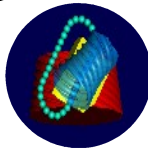

Ultra precision processing technology

Design and implementation of solar collector systems

Energy rationalization, energy monitoring

Product and technology development

Production and sales of own developed products

Our production services

Production of special stainless steel products/ structures
Engineering design and all-around on-site implementation of locksmith industry structures and technological equipments
Design and production of prototypes, small and large scale products
Design and production of target machines and their units

Our production technologies

Ultra precision processing
3 and 5axis milling
Electric discharge machining
Cutting on CNC shearing machine
Plasma cutting

Brushing of flatbars, tubes and square tubes
Polishing of flatbars, tubes and square tubes
Tube and edge bending
Surface treatment
Welding (TIG,MIG, spot welding)

Certificates

Compliance with Hungarian quality and environmental management system standards according to MSZ EN ISO 9001:2009 and MSZ EN 14001:2005
MSZ EN ISO 3834-2-2006 welding certificate
Hungarian National Technical Approval for the drain systems of Direct-Line Ltd.

Borsodchem Zrt.

Year: 2013
Location: Kazinczbarcika

Work:
Manufacturing of stainless steel loading arm

Lac-coop Kft.

Year: 2013
Location: Debrecen

Work:
Single-leg platform with folding stairs

Year: 2012
Location: Makó

Work:

Reconstruction of wastewater side lifts
Stainless steel pipes
Stainless steel pit covers
Stainless steel ladders

**CHARMOL
Hungary Kft.**

Year: 2012
Location: Dunaföldvár

Work:
Loading arm for railways DN150
Tilting stairs

Year: 2012
Location: Kalocsa – Foktő

Work:
Filling podium for railways
Dome handling bridge
Production and implementation of tilting stairs

West Hungária Bau Kft.

Year: 2011
Location: OSI Bábolna meat plant

Work:

Stainless steel podium of 300 m² surface, stainless steel drains
Stainless steel cooking oil storage of 59 m² with unique grid
Production of stainless steel railing systems
Production of stainless steel pit covers, etc.

Year: 2011
Location: Flavor material factory to be built in Makó
Work: Stainless steel podium elements

Year: 2011
Location: Bükkfürdő

Work:
Railing system of 300 running meters made of glass and rods

**ÉPDU–FERR Kft.
and Multisteel
Hungary Kft.**

Year: 2011

Location: Kecskemét competition swimming pool

Work:

Stainless steel railing systems

Stainless steel arched drains

Stainless steel pit covers

Stainless steel ladders

Year: 2011
Location: Budapest, KÖKI terminal
Work:
Stainless steel propeller fountain

Year: 2011

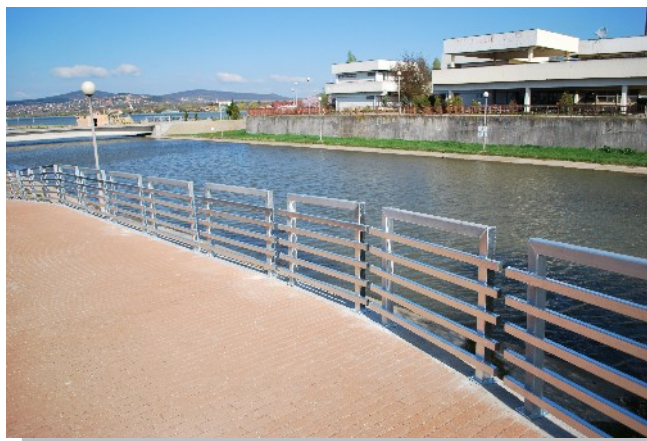

Location: „Velence–lake gate” project

Work:

Stainless steel structures

Sight element

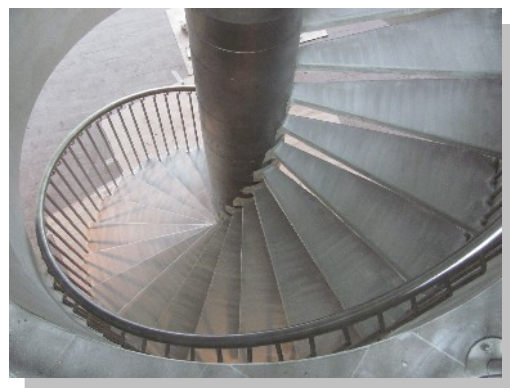

Railing systems

Hotel Azúr, Siófok

Year: 2011
Location: Hotel Azúr, Siófok

Work:
Stainless steel winding staircase

Municipality of 13th district, Budapest
